LALUAN

See where your career goes before AI changes it.

Laluan proposes. You decide. Every number shows its working.

A career GPS for Malaysian workers and students in the AI era.

Made in UTM · XMUM Hackathon 2026 · Domain 1: Aiversecity Future-Ready Workforce

THE CURRENT REALITY

Problem-Solution Fit · 25%

AI reached the desk before the training did.

56%

use AI at work

of Malaysian professionals already use AI tools in their job.

26%

have had AI training

Fewer than half of the people using AI were ever trained for it.

600K+

need reskilling

Malaysian workers who need reskilling within 3–5 years.

TODAY'S ANSWERS

Job portals show today's openings, not where jobs are heading.

Chatbots guess the future with no sources and invent courses.

Skills lists go out of date before they are published.

Sources: Hays Asia Salary Guide 2025 · MOSTI

Same question. Very different answer.

Aisyah, data-entry clerk in Shah Alam · 9 years of invoice entry · her team just adopted an AI invoice reader

Question	● Asking a chatbot	● With Laluan
Will my job exist in 2030?	A paragraph of opinion	−13% slow · −31% baseline · −52% fast, all sourced
Which tasks go first?	General guesses	3 of 5 core tasks: “AI does it” (O*NET tasks, team-labelled)
Where should I aim?	A list of popular jobs	AI operations specialist: 37% fit, +45% by 2030
Is the move worth it?	No figures	Grows in all 3 futures; pays RM 3,431 a month more
What do I learn first?	Courses that may not exist	6 catalogue courses, about 397 hours, all free
My personal details	Sent to the model as typed	Name, IC, phone, email removed before any AI reads them
Same answer for every name?	Not checked	Identical across 8 Malaysian names: 59 of 59 checks pass

Measured, not claimed: every figure on the right is from the live app and its approved forecast of 23 Oct 2026.

Four stops from today's job to the next one.

1 Where I stand

YOU

Upload a CV (PDF, Word, scan or photo), paste text, answer a short quiz, or speak.

LALUAN

- Removes name, IC, phone and email before any AI reads it
- Reads your skills; you confirm the list
- Shows which of your job's tasks AI takes

AISYAH

Data entry clerk: −32% by 2030. 3 of 5 tasks: "AI does it".

2 Explore roles

YOU

Pick an AI speed (slow, expected, fast or custom), a year to 2030, and an SDG goal.

LALUAN

- Ranks 23 roles in 17 fields: 60% fit + 40% outlook
- "Why this rank?", forecast x-ray, pay, pros and cons
- Tipping point: when your job turns declining

AISYAH

#1 Drafting & BIM technician: 40% fit, +35% by 2030.

3 Build my skills

YOU

Set a destination, tick off courses as you finish, and prove each skill level.

LALUAN

- Ordered pathway from 38 checked courses: hours, RM cost
- HRD Corp-claimable first for workers
- Skill tree: 3 proof questions a level

AISYAH

3 courses, about 37 hours, 2 free. Biggest gap: CAD and BIM.

4 Apply and share

YOU

Look at real openings, practise an interview, and share your plan.

LALUAN

- Open jobs in Malaysia from current job ads
- 5-question interview practice with feedback
- Career identity statement and a Future Card

AISYAH

Interview practice opens with "why BIM?", then CAD and BIM.

Also live: Future Skills Radar · AI coach that only suggests · re-planning when a forecast changes · HR and class views · EN, BM, 中文

Every percentage opens to the steps behind it.

How this forecast is built: Engineering drafting and BIM technician

Step	Change	Running total
Published baseline, 2025 to 2030 WEF Future of Jobs Report 2025, Figure 2.3 (net job growth 2025-2030, read from the chart by scripts/extract_wef_figure.py) adjusted by arxiv research momentum and Hacker News 'Who is hiring?' threads (Algolia public API) and OpenDOSM Salaries & Wages Survey (employees by occupation) and freehire.me Malaysian job postings (snapshot 2026-10-22-wef-foj-2025)	+20.8	**+20.8%**
Job-posting demand change in postings that mention this role's skills; snapshot 2026-10-22-trend-092120 · capped at ±15 points	0.0	**+20.8%**
Malaysian employment OpenDOSM: employee growth in this role's occupation group vs all employees; snapshot 2026-10-22-trend-092120 · capped at ±10 points	-0.6	**+20.2%**
AI research momentum research growth in capabilities that help or replace this role; snapshot 2026-10-22-trend-092120 · capped at ±15 points	+15.0	**+35.2%**
AI adoption 1× (Baseline) (1 − 1) × 40 × (works with AI 0.9 − exposed to automation 0.45); both are team estimates	0.0	**+35.2%**
Scaled to 2030 100% of the way from 2025 to 2030	0.0	**+35.2%**

FIVE SIGNALS, EACH CAPPED

WEF Future of Jobs 2025 — base
Published baseline by role, 2025 to 2030

Malaysian & global job ads — ±15
Change in postings that mention the role's skills

OpenDOSM employment — ±10
Growth of the role's occupation group in Malaysia

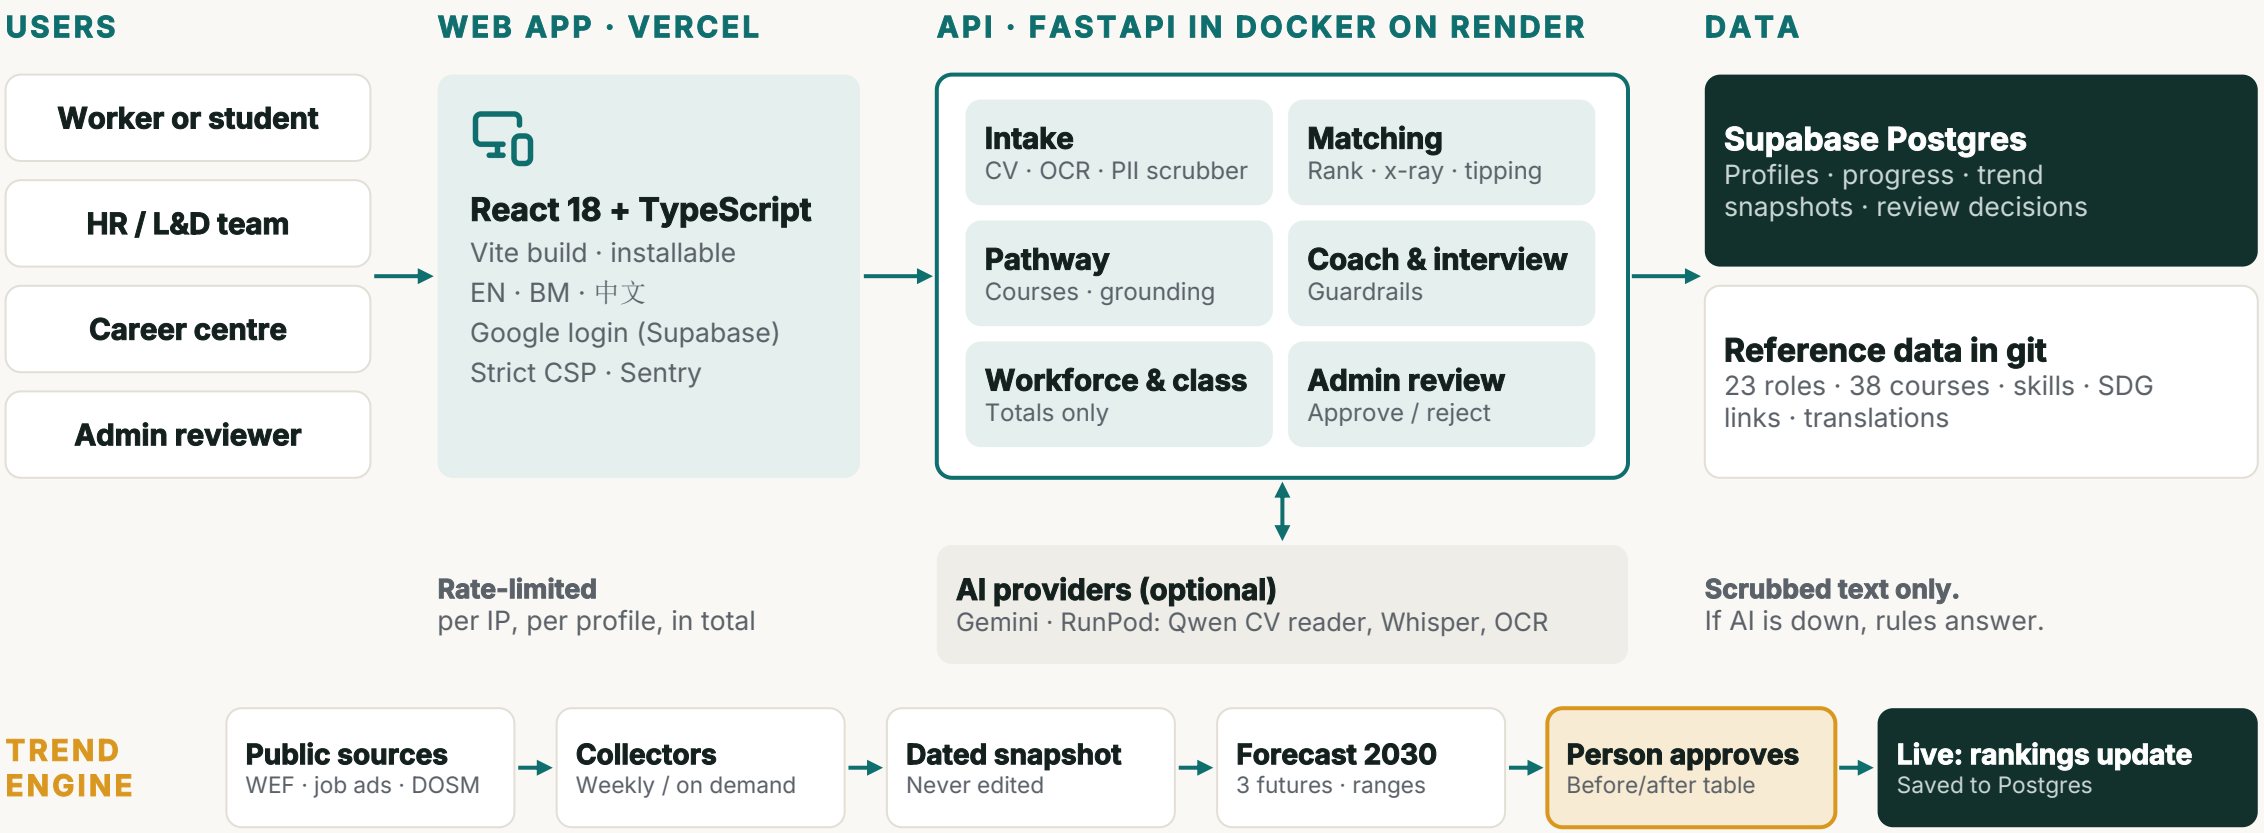

arXiv / OpenAlex research — ±15
Momentum of AI capabilities that help or replace it

AI adoption scenario — 0.5–2×
Slow, baseline, fast, or any speed from 0.5× to 2×

Rank = **60% skill fit + 40% outlook**

80% ranges · backtest published · declining roles rank last

Four tiers, one approval gate.

TRUST & PROOF

Human-centred AI · Impact

People stay in charge. Try it live today.

Human approval

Trend updates wait for a person to approve, or reject with a reason.

Privacy by design

Names, IC, phone and email removed before AI reads text. CVs never stored.

Fairness, tested

Run under 8 Malaysian names; rankings must be identical.

Nothing invented

Courses only from a checked catalogue; AI text checked against sources.

59 / 59
fairness checks pass

430+
backend tests on every push

60
frontend and accessibility tests

0
CVs stored

See where your career goes before AI changes it.

4 SDG 4 · Quality Education

8 SDG 8 · Decent Work
