Judging Laluan? Open the demo profile in one click → laluan-psi.vercel.app

LALUAN

See where your career goes before AI changes it.

Laluan proposes. You decide. Every number shows its working.

A career GPS for Malaysian workers and students in the AI era.

Made in UTM · XMUM Hackathon 2026 · Domain 1: Aiversecity Future-Ready Workforce

THE CURRENT REALITY

Problem-Solution Fit · 25%

AI reached the desk before the training did.

56%

use AI at work

of Malaysian professionals already use AI tools in their job.

26%

have had AI training

Fewer than half of the people using AI were ever trained for it.

600K+

need reskilling

Malaysian workers who need reskilling within 3–5 years.

TODAY'S ANSWERS

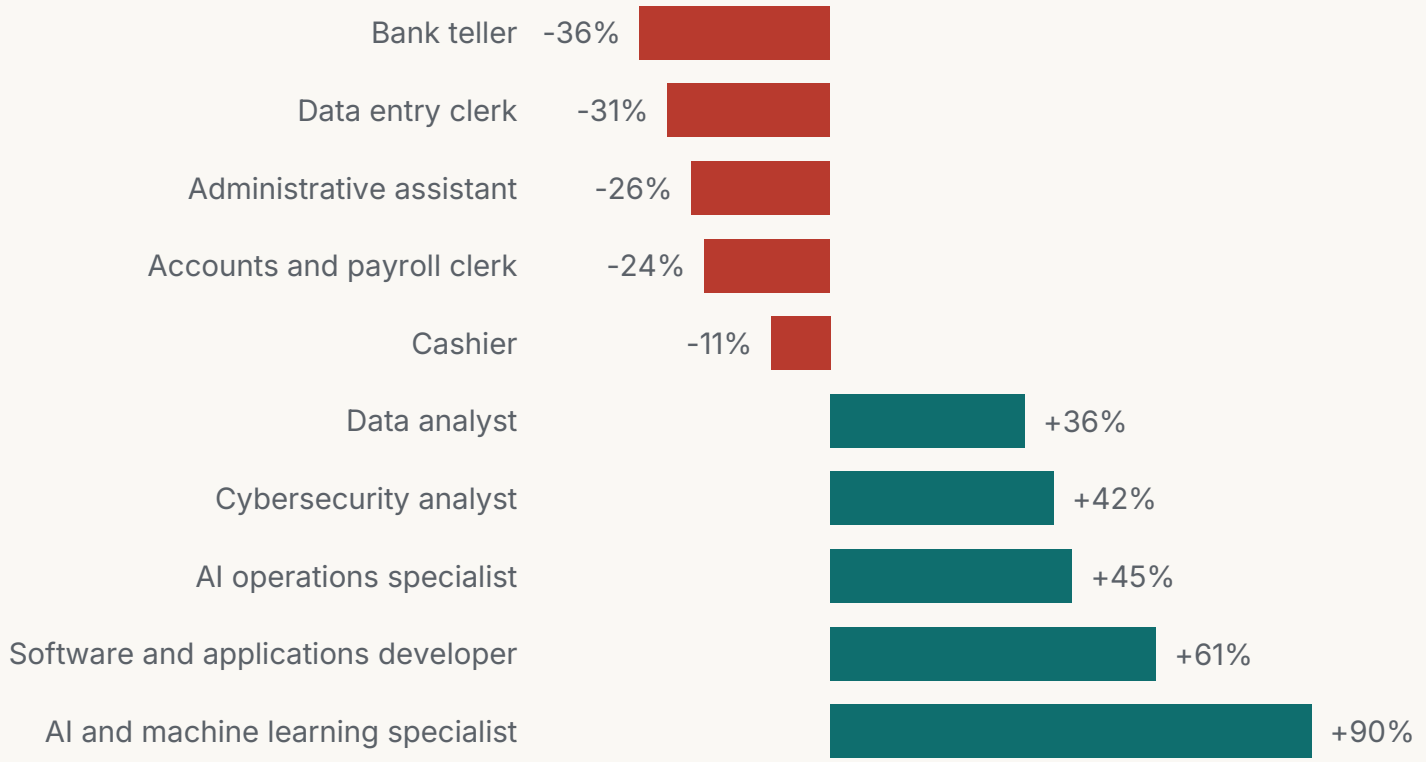

Job portals show today's openings, not where jobs are heading.

Chatbots guess the future with no sources and invent courses.

Skills lists go out of date before they are published.

Sources: Hays Asia Salary Guide 2025 · MOSTI

Clerical work shrinks; AI-adjacent work grows

22% **of formal jobs churn by 2030**

170 million created and 92 million displaced worldwide (WEF).

600K+ **Malaysian workers to reskill**

within three to five years, says MOSTI. Most have little time or budget.

WHO WE BUILD FOR FIRST

Clerks and service staff facing AI tools, graduates choosing a first job, and the HR teams and career centres advising them.

Bars: Laluan's 2030 baseline outlook (WEF 2025 Fig. 2.3 adjusted by Malaysian signals, snapshot 23 Oct 2026). Cards: WEF 2025 Fig. 2.1 · MOSTI

Same question. Very different answer.

Aisyah, data-entry clerk in Shah Alam · 9 years of invoice entry · her team just adopted an AI invoice reader

Question	● Asking a chatbot	● With Laluan
Will my job exist in 2030?	A paragraph of opinion	−13% slow · −31% baseline · −52% fast, all sourced
Which tasks go first?	General guesses	3 of 5 core tasks: “AI does it” (O*NET tasks, team-labelled)
Where should I aim?	A list of popular jobs	AI operations specialist: 37% fit, +45% by 2030
Is the move worth it?	No figures	Grows in all 3 futures; pays RM 3,431 a month more
What do I learn first?	Courses that may not exist	6 catalogue courses, about 397 hours, all free
My personal details	Sent to the model as typed	Name, IC, phone, email removed before any AI reads them
Same answer for every name?	Not checked	Identical across 8 Malaysian names: 59 of 59 checks pass

Measured, not claimed: every figure on the right is from the live app and its approved forecast of 23 Oct 2026.

Four stops from today's job to the next one.

1 Where I stand

YOU

Upload a CV (PDF, Word, scan or photo), paste text, answer a short quiz, or speak.

LALUAN

- Removes name, IC, phone and email before any AI reads it
- Reads your skills; you confirm the list
- Shows which of your job's tasks AI takes

AISYAH

Data entry clerk: −32% by 2030. 3 of 5 tasks: "AI does it".

2 Explore roles

YOU

Pick an AI speed (slow, expected, fast or custom), a year to 2030, and an SDG goal.

LALUAN

- Ranks 23 roles in 17 fields: 60% fit + 40% outlook
- "Why this rank?", forecast x-ray, pay, pros and cons
- Tipping point: when your job turns declining

AISYAH

#1 Drafting & BIM technician: 40% fit, +35% by 2030.

3 Build my skills

YOU

Set a destination, tick off courses as you finish, and prove each skill level.

LALUAN

- Ordered pathway from 38 checked courses: hours, RM cost
- HRD Corp-claimable first for workers
- Skill tree: 3 proof questions a level

AISYAH

3 courses, about 37 hours, 2 free. Biggest gap: CAD and BIM.

4 Apply and share

YOU

Look at real openings, practise an interview, and share your plan.

LALUAN

- Open jobs in Malaysia from current job ads
- 5-question interview practice with feedback
- Career identity statement and a Future Card

AISYAH

Interview practice opens with "why BIM?", then CAD and BIM.

Also live: Future Skills Radar · AI coach that only suggests · re-planning when a forecast changes · HR and class views · EN, BM, 中文

Built for SDG 4 and SDG 8, with a reason each

4 SDG 4
Quality Education

4.4 Relevant skills for decent jobs

4.3 Affordable technical and vocational learning

8 SDG 8
Decent Work and Economic Growth

8.5 Full and productive employment

8.2 Productivity through innovation

A reason for every link

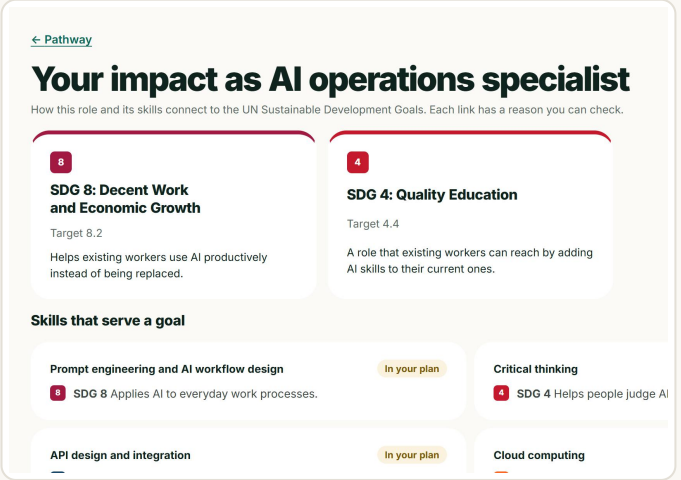

23 roles and 51 skills each link to an SDG target, with a sentence you can check.

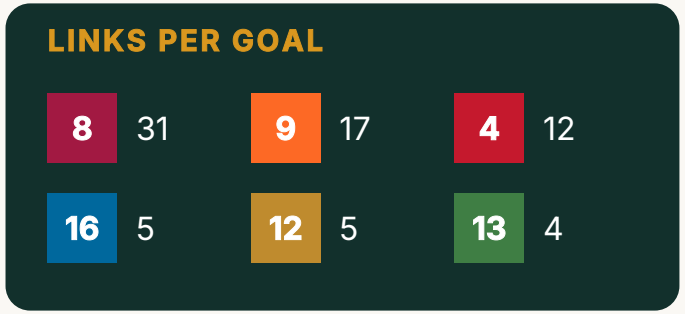

The SDG lens

Pick a goal: “6 of your top 10 roles serve SDG 8”, the best role for it and the cost in fit and hours.

Impact across Malaysia

Which goals users are heading for, as totals; groups under 3 are hidden.

12 goals linked in all; the counts are role and skill links in backend/data/sdg_map.json. Targets: United Nations, sdgs.un.org/goals.

Every percentage opens to the steps behind it.

How this forecast is built: Engineering drafting and BIM technician

Step	Change	Running total
Published baseline, 2025 to 2030 WEF Future of Jobs Report 2025, Figure 2.3 (net job growth 2025-2030, read from the chart by scripts/extract_wef_figure.py) adjusted by arxiv research momentum and Hacker News 'Who is hiring?' threads (Algolia public API) and OpenDOSM Salaries & Wages Survey (employees by occupation) and freehire.me Malaysian job postings (snapshot 2026-10-22-wef-foj-2025)	+20.8	**+20.8%**

dated on Sources

If a source fails, the last approved forecast stays live and arXiv falls back to OpenAlex. Every snapshot, and who approved it, is listed on the Sources page.

Three futures, and the speed where hers flips

Her best match in three futures

+29%	+45%	+65%
slow	baseline	fast

TIPPING POINT

Below 0.8× AI speed, BIM technician overtakes AI operations specialist. Drag the slider from 0.5× to 2× to see it.

Why this rank? It is arithmetic

0.6 × skill fit + 0.4 × outlook + preference = **0.48**
Robust pick: top five in all three scenarios.

Figures from the live app's approved forecast of 23 Oct 2026. Outlooks are estimates with 80% ranges, labelled Likely or Uncertain.

A plan she can start this week: 397 h, RM 0

6	397 h	RM 0	37%
steps	of learning	all free or free to audit	ready now, 100% at the end

Courses only from the catalogue

38 link-checked courses, 32 free or free to audit, with hours, RM price and the date checked.

HRD Corp first for workers

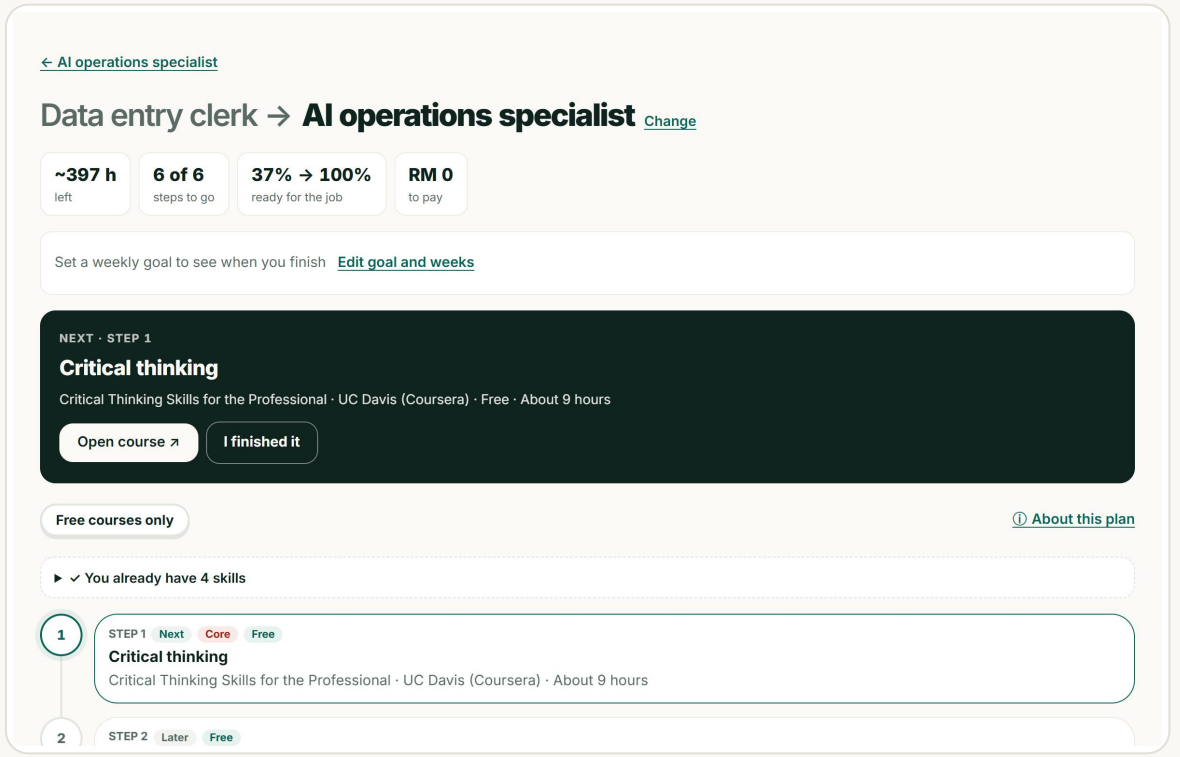

Claimable programmes come first; students get free routes.

Tick, then prove it

Readiness and Today update at once; three questions prove each skill (practice, not a certificate).

Into her calendar

A weekly goal says when she'll be ready; download a calendar file.

Her plan: Critical thinking → Cloud → Data visualisation and SQL → Python → Project management → Prompt engineering and APIs.

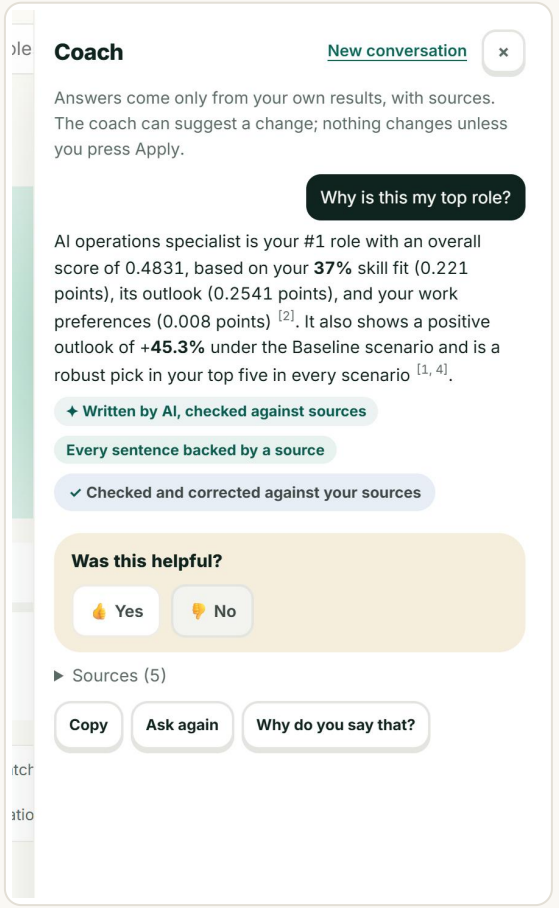

AI COACH

Human-centred AI · Safety

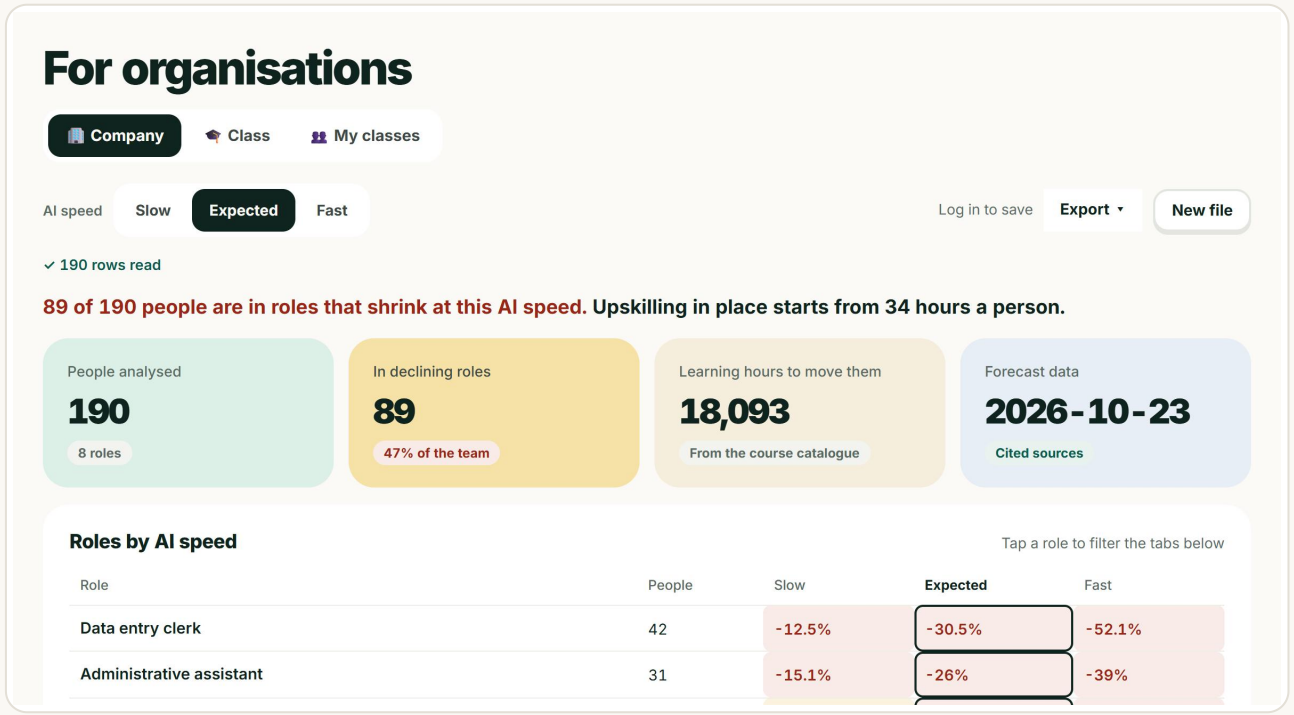

A coach that cites, checks itself and suggests

Numbered sources	Answers only from her own results, each claim tagged [1], [2]...
Every sentence checked	Unsupported sentences are rewritten or removed, and the answer says so.
Details removed first	Names, phone, email and IC numbers never reach the model.
Trick prompts refused	“Ignore your instructions...” gets a calm refusal; nothing changes.
Suggests, never acts	A change of scenario or goal waits for her to press Apply.

Models: Qwen2.5-7B on RunPod reads CVs · Gemini writes answers · no key: rules

For HR teams and career centres: totals only

HR and L&D teams

190 staff in the sample company; **89** in roles that shrink.

Cheapest moves: upskill in place, or the nearest growing role.

HRD Corp training-grant plan; CSV and PDF export.

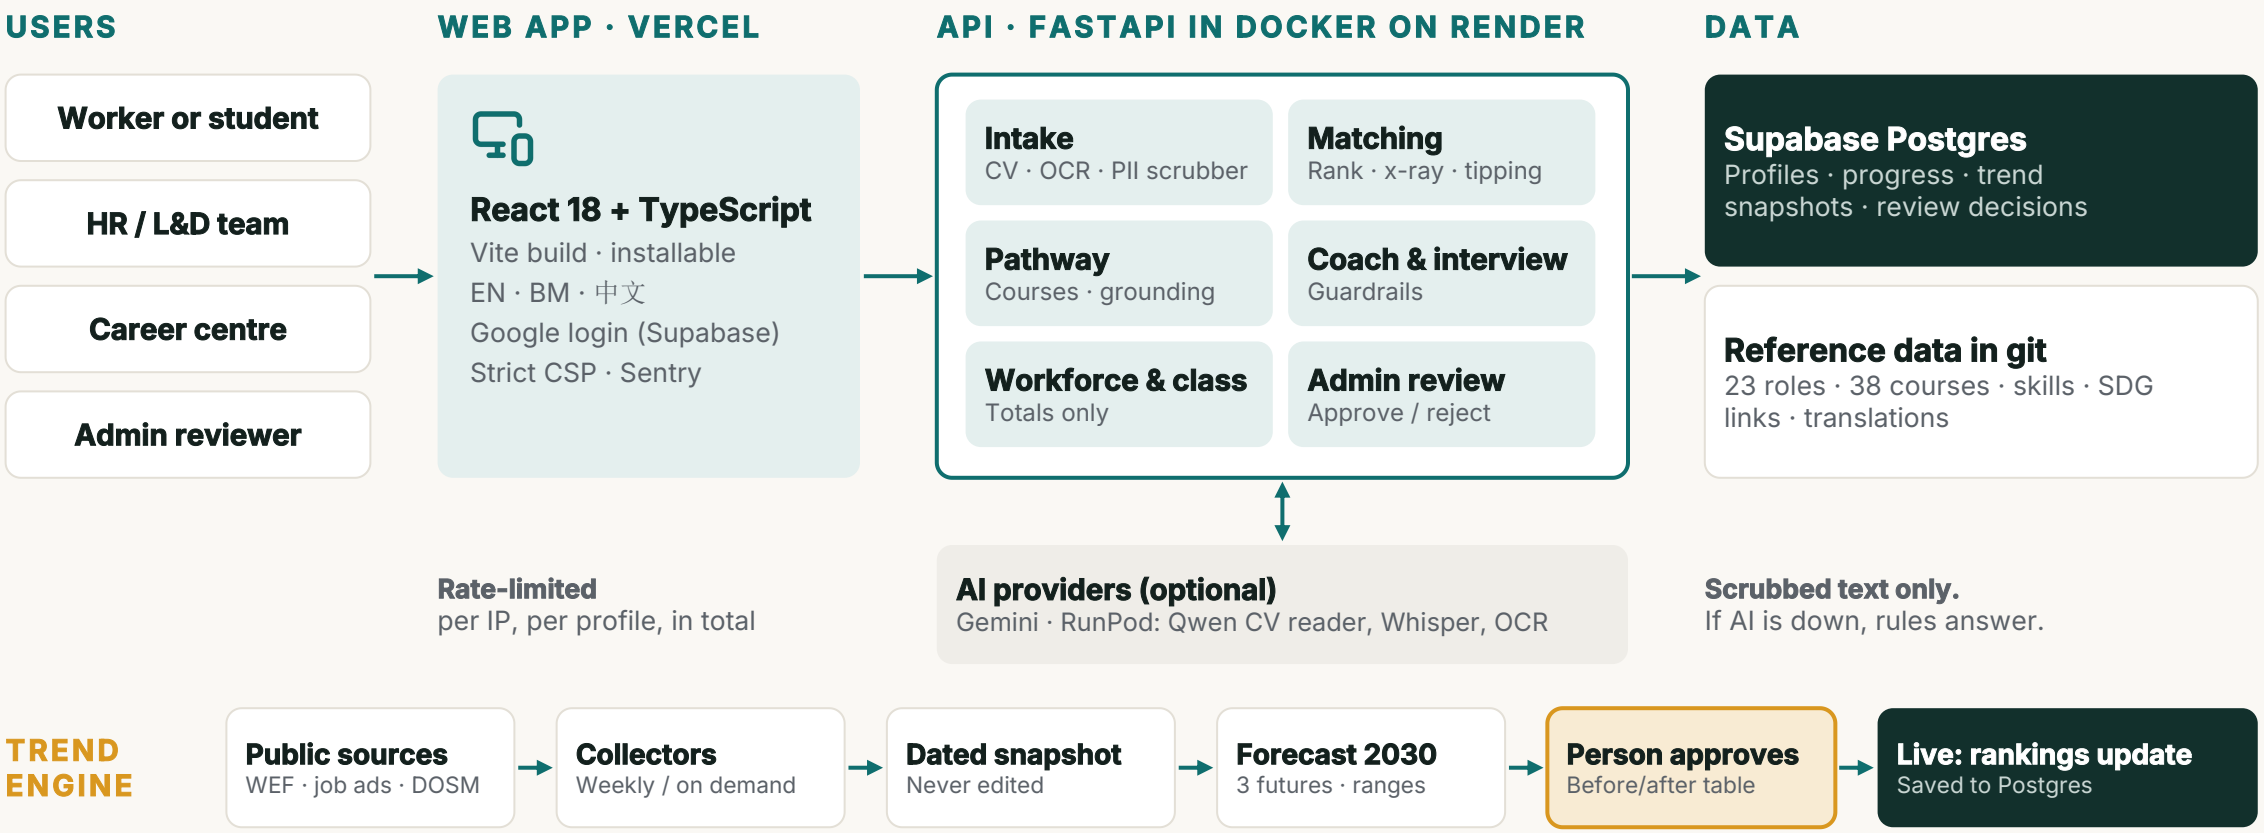

TVET and university career centres

52 students in 5 programmes; the top shared gap is **analytical thinking** (20 students).

Counsellors see only what students choose to share.

Totals only. Files with name, email, IC, phone or staff-ID columns are refused; groups under 3 are hidden; Laluan never ranks people for hiring.

Four tiers, one approval gate.

TREND ENGINE

Public sources — WEF · job ads · DOSM → **Collectors** — Weekly / on demand → **Dated snapshot** — Never edited → **Forecast 2030** — 3 futures · ranges → **Person approves** — Before/after table → **Live: rankings update** — Saved to Postgres

HARDEST RISK

Feasibility of Build · 25%

Our hardest risk is data, so we measure it

14 / 19

clear trends held direction

vs 12 for “everything rises”; sizes still rougher than “no change”

59 / 59

fairness checks pass

3 profiles and 5 CVs under 8 Malaysian names: identical results

500+

backend tests

run on every push, with 63 frontend and accessibility tests

0

CVs stored

read in memory; personal details removed before any AI

IF SOMETHING FAILS

Noisy trend	shrunk towards no change, shown with 80% ranges
Data source down	the last approved forecast stays live; arXiv → OpenAlex
RunPod cold or down	Qwen → Gemini on scrubbed text → skills dictionary
No AI key at all	matching, forecasts and pathways still run: rules and templates

Backtest of 21 Oct 2026, published on the Radar. Fairness check public at /api/fairness and on the Sources page; it runs in CI.

WHAT COMES NEXT

Feasibility · Clarity

What is not done yet, and what comes next

Not done yet

- Demo people, CVs, companies and classes are synthetic
- Human scoring with a counsellor is not recorded yet
- Forecast sizes are rougher than a “no change” guess
- 23 roles and 38 courses: a starting catalogue
- Free hosting wakes up slowly after idle hours

Next, in Phase 2

- Run the review kit with a counsellor and native BM and 中文 speakers
- Pilot the class view with a TVET or university career centre
- Add Malaysian providers and HRD Corp programmes
- Sharpen forecast sizes, not just direction
- Always-on hosting, no wake-up delay

PHASE 2 TARGETS, FROM OUR PROPOSAL

≤ 5 min	≥ 80%	100%	≥ 70%	≥ 70%
CV to a costed plan	skill-reading recall	recommendations cited	plan steps free	counsellor agreement

THE TEAM

Made in UTM

Four people, one route

BUILT WITH

RunPod 3 endpoints: Qwen2.5-7B, Whisper, OCR	**Replit** clean cloud test environment	**Gemini** coach, interview feedback, summaries
Supabase Postgres, row-level security, login	**Vercel + Render** web app and Docker API	**GitHub Actions** tests and weekly refresh

TRUST & PROOF

Human-centred AI · Impact

People stay in charge. Try it live today.

Human approval

Trend updates wait for a person to approve, or reject with a reason.

Privacy by design

Names, IC, phone and email removed before AI reads text. CVs never stored.

Fairness, tested

Run under 8 Malaysian names; rankings must be identical.

Nothing invented

Courses only from a checked catalogue; AI text checked against sources.

59 / 59
fairness checks pass

500+
backend tests on every push

63
frontend and accessibility tests

0
CVs stored

See where your career goes before AI changes it.

4 SDG 4 · Quality Education

8 SDG 8 · Decent Work
